

How to get a document's URL or website address

Michael C. - 2023-01-12 - Documents

In order to create a link to a document that has been uploaded to MemberNova, you will first need to find the document's URL or website address.

Finding the Document's URL/Address

1. From the **Documents** area, click **Get Link** on the same line as the document you would like the URL/address for.
2. A box will appear with the URL highlighted. Please copy the text that appears.
 - To copy the address on a Windows device, highlight the URL with your mouse cursors and push CTRL + C on your keyboard
 - To copy the address on a macOS device, highlight the URL with your mouse cursors and push COMMAND + C on your keyboard
3. You can then use the copied URL anywhere you need to link to the document.
