

How to add a link

Mickey D. - 2023-01-12 - Website Content

In a widget or story you may wish to include a link to another page, document, or other web link.

How to create a link

1. While editing a widget or story enter the text or an image which you would like to use as a link, e.g., "click here to learn more".
2. Highlight the text or image you just entered and click on the **Link** icon (chain Icon) in the grey toolbar.
3. You will get the following **Insert Link** window.
4. Choose which **Link Type** you would like. Here are the different types of links which can be opened.
 - **URL** - Allows you to enter any URL or website address which will redirect visitors to that site. Be sure to include https:// in front of the website address.
 - **Custom Page** - This allows you to link to a custom page you have created in your website.
 - **Built-in Page:** Built-in pages are system created pages that update automatically. The options you can choose are:
 - **Home** - The home page.
 - **Bulletin List** - A web page with a list of your website bulletins.
 - **Contact Us** - A web page where a visitor can email the website contact.
 - **Event Calendar** - A web page which displays a calendar with events on it from [Events](#).
 - **Events (Card View)** - A web page which displays [Events](#) as thumbnails.
 - **Events List** - A web page which displays a list of [Events](#).
 - **Photo Albums** - A web page that displays photo albums.
 - **Search** - A web page where you can perform a search for content on

the website.

- **Stories** - A web page that displays a list of website stories.

- **Photo Album**: This activates a drop down menu where you may select a link to a photo album to display on the homepage menu.
- **Story** - This allows you to select an existing story.
- **Document** - Allows you to select a file for download from the [Documents](#) area.
- **Form** - This allows you to select a form.
- **Event** - Displays a drop down list of [Events](#) which were created by the Organization.
- **Email** - This allows you to create a link to send an email into the entered email address.

5. After you select the link type, select what is to be linked or paste in the URL if you selected URL.

6. Next, click the **Target** drop-down selection where you have the option to select whether the link will open in the Same Window, in a New Window, etc.

- **Same Window** - Opens the link in the current window/tab.
- **New Window** - Opens the link in a new window/tab. This allows the user to stay on the page where they currently are. When the user closes that new window/tab, the current page will be displayed again.

7. Once done click **OK**.

Removing a Link

Removing a link is just as easy as adding it. To remove the link, right click on the link and select **Unlink**.
