# How to update the homepage

David H. - 2023-01-23 - [Website Designer](#)

MemberNova's Live Website Designer allows you to easily modify your website at any time.

## Editing the homepage

1. Click **Website** or the **Globe** icon on the left.
2. Click **Page Designer**.
3. You will see a list of pages as thumbnails in the **Recent Pages** area. Click on the thumbnail named **Home Page**. You will be redirected to the Live Designer page.
4. From here, there are several options available:
  - **Website Container** - You will see a large area which displays the homepage. You can modify the following simply by clicking on the various areas:
    - **Logo** - You can update the website's [logo](#) by clicking on the logo near the website's menu.
    - **Menu** - By clicking on the website's [menu](#), you will be redirected to the Edit Menu page.
    - **Footer** - At the bottom of the page you will see the footer area. To edit, click on the [footer](#) area.
5. Using the options on the right side of the page, you can access:
  - **Content** - By clicking this button, you will gain access to the [Widgets](#). You can drag and drop a widget and place it where you wish. There are two different icons displayed on the widgets:
    - **+ icon** - This means the [Widgets](#) will be created when you drag it over to the page.
    - **Magnifying glass icon** - This means the widget already exists and can be clicked on to preview.
  - **Themes** - By clicking this button, you can set a new [theme](#) for the website. This controls the look and color of the site.
  - **Layouts** - By clicking this button, you can set a new [layout or page structure](#) for the website.
6. Along the top of the Live Designer, you will have these options:
  - **Preview** (Computer screen, Tablet, and Mobile phone icon) - By clicking on each of these icons near the top, it allows you to see a [preview](#) of how the page looks on different devices.

- **View Live Page** - This button will take you to the live page on the website.
- **Publish** (button) - This makes the changes you made go live.

7. Click on **Publish**, to have your changes to live.

Note

After you click **Publish**, the updates will appear on your website within a few seconds.
