How to upload an Apple Touch Icon

Omar S. - 2023-02-15 - Website Settings

You are able to add an Apple Touch Icon for your website. This will appear in the Apple Touch Bar on appropriate Apple devices that have a touch bar.

1. Click **Settings** or the **Gear icon** on the left menu.
2. Click the **Website & Branding** tab.
3. Click the **Apple Touch** link in the **Logos and Images** section.
4. On the **Edit Apple Touch Icon** page, click **Choose File** (it may also say **Browse** or **Upload** depending on your browser).
5. Using the file explorer, select the image file you want to use as the Apple Touch Icon.
6. Once the Apple Touch icon is uploaded, click the **Save** button.

Note

Only .png type image files are able to be used for the Apple Touch Icon.

To remove the Apple Touch Icon, click the **Delete** button on the **Edit Apple Touch Icon** page, just below the Apple Touch Icon preview.
