How to upload my own CSS for the member area

Omar S. - 2023-02-15 - [Website Settings](#)

You can upload your own CSS formatting (Cascading Style Sheet) to override the Member Area theme & formatting for different kinds of elements in the Member Area, including the left panel navigation, Member Area section titles, and more.

Adding the CSS File to the Member Area

1. Click **Settings** or the **Gear icon** on the left menu.

2. Click the **Website & Branding** tab.

3. Click the **Member Area Stylesheet (CSS)** link in the **Design** section.

4. On the Member Area Style Sheets page, click the **Add Website CSS File** button.

5. Click the **Choose File** or **Upload** button to upload your CSS file.

6. In the file explorer, select the CSS file on your device by double-clicking it, or clicking it once, then clicking the **Open** button from your device. **Note**: Only .css file types are able to be uploaded for the Member Area CSS.

7. Check the **Make Active** checkbox**,** to apply your CSS to the Member Area.

8. Click the **Save** button to save the CSS file.

Once the CSS file is saved & made active, the formatting from the CSS file will override any Member Area elements that have been given a style in the CSS file.

Deleting or Deactivating the Member Area CSS File

1. Click **Settings** or the **Gear icon** on the left menu.

2. Click the **Website & Branding** tab.

3. Click **Member Area Stylesheet (CSS)** in the **Design** section.

4. On the Member Area Style Sheets page, click the **Actions drop-down arrow** on the same line as the CSS file. It will display the following options:

   - **Deactivate** - Deactivates the styling in the CSS file & keeps the file.

   - **Delete** - Deletes the styling file from the account**.**
