How to embed a YouTube video

Michael C. - 2023-02-15 - Website Content

You can add a YouTube video to a widget or story. This way the video will be embedded and display right within your website.

Adding a YouTube Video

1. Go to YouTube and find the video you wish to embed.
2. Click on the **Share** link, located below the video.
3. Click on the **Embed** option, then copy the code that appears.
4. Return to your widget or story and click on the **Embed Media** icon on the online editor menu bar.
5. A blank **Embed Media Dialog** window will appear. Paste the copied content into the field.
6. Click the **OK** button.
7. The video will now appear within the widget or story.
