What are built-in pages

Michael C. - 2023-01-12 - Website Content

Built-in pages are system created pages that update automatically as you update related information within your website. The Built-in pages include:

- **Contact Us** - A page where an individual can send an email to the current Website Contact.
- **Bulletin List** - A page which lists all of the organization's public bulletins.
- **Event Calendar** - A page which displays the organization's events within a calendar format.
- **Events (Card View)** - A page which displays the organization's upcoming events within a grid view.
- **Events List** - A page which lists the organization's upcoming events.
- **Photo Albums** - This page displays any photo albums created by the organization, allowing quick access to view the photos and a slideshow.
- **Search** - Allows an individual to search keywords for content on the website.
- **Stories** - A list of the organization's stories.

These built-in pages can be selected when adding new menu items to the website's navigation menu, or when creating a link within a story or custom widget.
