What are built-in pages

Michael C. - 2023-01-12 - Website Content

Built-in pages are system created pages that update automatically as you update related information within your website. The Built-in pages include:

- Contact Us A page where an individual can send an email to the current <u>Website</u>
 Contact.
- Bulletin List A page which lists all of the organization's public bulletins.
- **Event Calendar** A page which displays the organization's <u>events</u> within a calendar format.
- **Events (Card View)** A page which displays the organization's upcoming <u>events</u> within a grid view.
- **Events List** A page which lists the organization's upcoming <u>events</u>.
- **Photo Albums** This page displays any photo albums created by the organization, allowing quick access to view the photos and a slideshow.
- Search Allows an individual to search keywords for content on the website.
- **Stories** A list of the organization's stories.

These built-in pages can be selected when adding new menu items to the website's navigation menu, or when creating a link within a story or custom widget.
